Data Notes

Agricultural Overview

This bulletin covers 27 agricultural industries in the State of California. The number of industries ranges from five to seventeen within each of the six geographic regions. The regions are the San Joaquin Valley, South Coast, Desert, Central Coast, Sacramento Valley, and North Coast (refer to map for details).

The data are organized into the following tables by state and region:

- Wage and Salary Workers
- Average Hourly Earnings

Introduction

The California Agricultural Bulletin is produced by the Employment Development Department (EDD) in cooperation with the U.S. Department of Agriculture and through a grant from the U.S. Department of Labor. Because of changes in sampling and estimating procedures, farm employment data published by EDD prior to January 1997 may not be strictly comparable to current estimates.

Summary

Employment

California agricultural employment for September 1999 registered an increase of 13,100 jobs from the previous month, a gain of three percent. The increase in Agricultural Production/Crops offset the decreases in other major industries. A seasonal increase in agricultural employment for the month of September is normal. The change in California agricultural employment from August 1998 to September 1998 was an increase of 8,000 jobs. From August 1999 to September 1999, Production/Crops registered an increase of 25,500 jobs, a gain of 11 percent. Production/Livestock decreased by 3,900, a loss of 15 percent. Agricultural Services registered a decrease of 8,500 jobs, a loss of four percent. Total California Agricultural Employment for September 1999 increased 2,300 jobs from the September 1998 level.

The San Joaquin Valley Region registered an increase of 9,800 jobs from August 1999 to September 1999. Agricultural Production, in this region, increased by 23 percent while Agricultural Services decreased seven percent from the previous month.

Production and Crop Activity

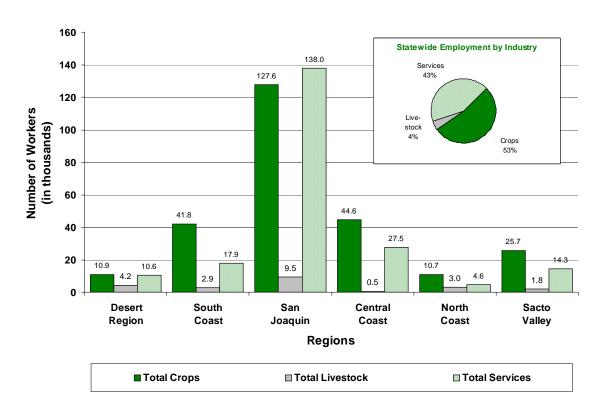

During the month, work in fields progressed normally under favorable conditions in most areas. Seedbed preparations were ongoing and fields were prepared for the planting of fall crops. Fall vegetables planted included broccoli, cauliflower, beets, carrots, radishes, spinach, Chinese cabbage, endive, and lettuce. Some strawberries were planted. Work crews were also busy with treatment and harvesting activities. Pumpkin, carrot, sugarbeet, cotton, and alfalfa fields were treated for insects. Some fields of peppers, lettuce, and broccoli were sprayed to control worms. Corn silage harvest was active in most growing areas and the harvesting of watermelons and cantaloupes continued. Work crews also harvested sugarbeets, cilantro, leeks, onions, garlic, chives, squash, sweet corn, melons, tomatoes, blackeye and garbanzo beans, cucumbers, peppers, sweet potatoes, eggplant, zucchini, okra, radishes, and peas. Alfalfa, bermuda, and sudan grass were cut for hay or greenchopped.

Vineyards continued to be active with increased momentum in the harvesting of table grapes and the harvest of wine grapes continued. Grapes for raisins were laid and some trays were rolled. Pear harvesting continued in the North Coast and Sacramento Valley regions, and was very active in the San Joaquin Valley. Work crews were also busy picking apples, pomegranates, and figs. They also harvested olives, almonds, walnuts, and pistachios. Valencia oranges and lemons were picked in southern California.

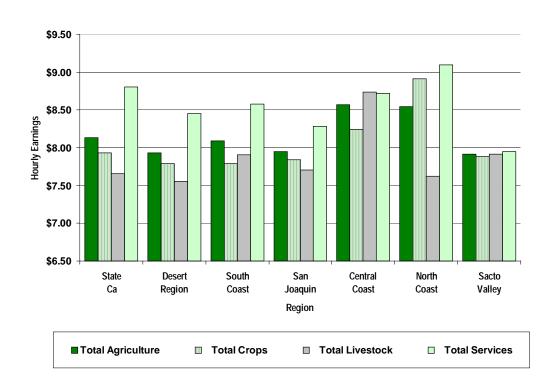

Sheep and beef cattle were moved from higher elevations to lower pastures. Calving was taking place in the central and northern areas.

DATA NOTES

Data Sources:

These data are obtained from two sources: the Employment Development Department (EDD) Covered Employment and Wages (ES-202) data files and a monthly survey conducted by the California Agricultural Statistical Service (CASS) of the U.S. Department of Agriculture (USDA) and the Labor Market Information Division of EDD of 4,200 agricultural employers. The sample was selected to be representative of the state's agricultural employers by size, geographic location, and industry categories. Sample data are gathered for the survey week that includes the 12th calendar day of the month. All data in this bulletin represent activities taking place during this mid-month period. Same month prior year employment data are benchmarked to the ES-202 data files maintained by EDD.

Data Comments:

To aid in accurate usage and interpretation of the data, please note the following:

- Agricultural Services employment data have been adjusted to reflect a recalculation of the survey sample results. Historical trend information was used to adjust sample data because of a low response rate.
- Regional data may show greater variability than statewide data because of small sample size and variable reporting patterns in specific industries.
- Current month regional estimates are based on the recorded addresses of owner-operators. Same month prior year regional data are based on worksite locations. Significant differences between regional current month and same month prior year data could result, although statewide totals might be comparable.
- Where data cannot be estimated because of inadequate sample reporting, the letters "na" have been entered into the field to indicate estimates are not available.
- Wage data include wages of supervisors and hired non-production workers (primarily administrative personnel). Piece rate data are also included where applicable.
- Fishing, forestry, and hunting industry data are not included in the Agricultural Services estimates. Unique seasonal industry patterns of employment make producing employment estimates for these industries problematic.
- Employment data do not include employers of unpaid family workers.
- Agricultural workers who are employed by farm labor contractors are reported in Agricultural Services under that
 industry category. Employment levels in Crop Production and Livestock Production do not reflect their activities in the
 associated industries that contract with the farm labor contractors.
- Total agricultural employment and hourly earnings estimates in this bulletin are derived from the monthly Current
 Employment Statistics for Agriculture project. Estimates in this bulletin will differ from other agricultural estimates
 published by EDD and the USDA because of differences in the number of industries covered and in the definition of
 agricultural workers.

Subscriptions:

Annual subscriptions are available for \$30.00 per year. Ask for publication number LAU-15. To subscribe or for information, please call (916) 262-2162 or write to:
